HAZHAR.NET

For Your World,
A Secure Way to Protect Your Future

Table of Contents

Hazhar.net takes great pride in delivering outstanding expertise and superior service.

Hazhar.net brings your systems together. We design, build and maintain stand-alone and integrated security systems. We have the ability to provide full turnkey solutions: taking a customer's requirements, designing and developing the concept, selecting the product that best fits the requirements, and completing the installation.

From development and design through installation and ongoing maintenance, we are a true partner, creating sustainable solutions that exceed expectations both now, and for many years to come. Our experience in a wide range of technology, products and systems, combined with strict attention to design detail, meets the diverse needs of our customers.

We back our engineering, technical and management expertise with dependable maintenance support and training to create cutting-edge solutions, including:

- CCTV Video Security
- Security Systems
- Fire Alarm Protection
- Network Infrastructure
- Smart Technologies
- Desktop / Monitor / Pc
- Server / Storage
- Laptop / Pos Machine
- Switches / Routers
- Printer / Scanner
- Industrial Pc
- Utp –Sftp- Fiber Optical Cable
- Ip - Telephone
- Finger Print Access Control
- Public Address System

We strive to achieve world-class standards in delivering quality, reliable, on-time, accurate and customized solutions and services

A video surveillance system is a critical component of a comprehensive security strategy. Hazhar.net is proud to offer the experience and expertise to design, install, service, and monitor a system that will fit your unique business needs, as well as integrate with your existing systems. Whether you're looking for basic local video surveillance systems or looking for your system to do more for your business, Hazhar.net can deliver the solution you.

From traditional local video surveillance to cutting-edge IP systems and cloud-based storage options, Hazhar.net can design, install, service, and monitor the right video system for your needs. With our expertise, we'll deliver the right video surveillance solution for your needs, including:

- IP and Thermal camera systems
- Local, network, and cloud-based video storage options
- Video monitoring
- Advanced video analytics capabilities & reporting
- Integration with intrusion, access control, and more

Any business can benefit from having a reliable surveillance camera system to deter theft, as well as monitor and document activities
on premises. Hazhar.net Security has highly trained technicians and engineers, and it's our goal to meet your security needs. We offer internal
and external security camera systems, onsite and cloud storage, and video management software from many leading brands, including
Hikvision, Dahua, Unbt, Blue storm and others. Whether you want your system to be wired or wireless, adapt to low
lighting, or record in high definition, we have the technology to meet your facility's video surveillance needs along with the skills
needed to install and integrate all the components of your video surveillance systems for easy management.

In addition to our local video storage options, Hazhar.net also offers Alarm cloud hosted video. Alarm gives small business owners an unprecedented combination of security and convenience, while also remaining cost-effective and a great fit for any location.

- Secure Cloud Storage - Encrypted, secure live video is streamed and stored within highly secure data centers

- Accessible Live Viewing - The user-friendly web-based platform and powerful mobile app allow quick and efficient viewing of your video streams

- Cost Effective Investment - Without the need for on-site video management and storage, your initial investment and ongoing maintenance costs are minimized

Alarm is a VSaaS , Qnap "Video Surveillance as a Service" solution integrating industry-leading Hikvision , commercial IP cameras with our cloud video features and storage. With ease of setup, navigation, and minimal infrastructure investment, Alarm allows commercial companies and small businesses to quickly deploy several cameras in multiple locations via the cloud hosted video platform, record and stream encrypted video, store video footage on the device or securely in the cloud or on both in a hybrid model, and easily access it from anywhere at any time using a mobile phone, tablet, or computer at your leisure. Alarm provides easy to use, low-cost cloud video surveillance for one to 64+ cameras, to protect your business whether you have a one or several locations. View your video footage through a desktop browser or on the go with your iOS or Android mobile device.

Installing reliable security systems is the easiest way for businesses to help prevent intrusion. Hazhar.net Security can design, install, service, and monitor effective security systems for businesses in a wide range of industries including commercial, retail, healthcare, financial, education, government, and more. Utilizing motion detectors, glass-break sensors, magnetic contacts or sensors, and other electronic security devices from the leading manufacturer Stale, our skilled technicians will build a comprehensive, intrusion security system that can detect any unauthorized attempt to access your facility, protecting your property, people, and assets.

Deterring intruders, protecting your most valuable assets & minimizing disruption Hazhar.net provides a high standard of security system installation and maintenance. We are dedicated to offering our customers the latest advancements and technologies in home alarm systems. From wireless to smart alarms, you can ensure that we are offering you the latest products fresh to the market. Hazhar.net deploys state-of-art technology to provide answers to a diverse range of security problems in both residential and commercial situations. Every property is different so we offer a bespoke solution for our customers. Our system designers will perform a FREE on-site survey of your property to design a system that fits your requirements. In today's society security systems for both residential and commercial properties are paramount. An intruder alarm is a worthwhile and cost-effective investment, giving you peace of mind when your property is vacant.

Having true access control for your business doesn't only mean preventing access to high security areas. It also means ensuring that employees and visitors can gain access to the areas needed at the right times with minimal barriers. Having effective access control systems in place is one of the most reliable ways to protect your business, property, and company information. Hazhar.net Security can design and install an access control system that allows people get to where they are needed at the right times, while also preventing unauthorized access to restricted areas.

Hazhar.net provides multiple options when it comes to managing your access control system. Depending on your solution, we can provide either a software- or web-based management application, which your team can use to easily manage your access system. Access control systems can also be integrated with intrusion systems, video surveillance systems, HR databases, badging, visitor entry systems, and more, allowing for greater control across your security platform. At Hazhar.net Security, our team of security experts has decades of experience designing effective access control systems for businesses in a broad range of industries. With state-of-the-art technologies from leading manufacturers installed by our highly skilled security technicians, your system will be both highly effective and easily managed to ensure the proper flow of people throughout your building and the security of your business, employees, and property.

Monitoring Control System (MCS) is a central call center which links customer and alarm systems to safety, health and regulatory authorities. This center delivers unprecedented integrated safety and security to clients by linking alarm systems to central monitoring, trouble shooting and communication with the local police, hospitals, fire stations, town council headquarters and other legal authorities. Communication is established through Hazhar.net Security System.

Hazhar.net provides a proven solution to help you meet your local and national building and fire code requirements. Utilizing code compliant equipment, Hazhar.net has the expertise to meet the needs of your fire alarm requirements. Protect employees and visitors to your facility and can reduce the risks to your business. Hazhar.net's Emergency Evacuation solutions combine the detection capabilities of our advanced fire alarm with the capabilities of emergency evacuation to provide a comprehensive life safety system for your building. For larger buildings where fire evacuations can be complicated, hazhar.net Security provides a variety of advanced capabilities. When our code-compliant alarm systems detect fire s, they will not only alert authorities, but also activate the building's life safety evacuation and communications systems. This can provide a crucial channel between first responders and your building occupants, ensuring enhanced safety for all involved.

Hazhar.net Fire Detection System Provides:

1. Building & Fire Code Compliance
2. FM Fire Monitoring with Dispatch
3. Early Notification
4. Stand Alone or Integrated Panels
5. Advanced Diagnostics & Occupant Notification
6. Life Safety Evacuation Alarm and Communication Systems
7. Test and Inspection Services for the alarm devices connected to your fire suppression system
8. Maintenance and Repair Services for the alarm devices

Think of network infrastructure as technological resilience, enabling your organization to support and adapt to ever-changing conditions and needs. Hazhar.net understands the imperative of designing and cultivating a successful network infrastructure that balances flexibility and functionality, reliable connectivity, and cost. We work with our customers to understand their specific needs and goals and then build up the network infrastructure as well as the total solutions. With the successful track record in designing local and wide-area networking solutions, we provide data networking building blocks like routing and switching, networking standards like Ethernet, Gigabit Ethernet, networking protocols like TCP/IP, and IPX.

Most likely, your network infrastructure starts with your Local Area Network. No matter what applications your business runs, your core LAN must be designed for high speed, extreme reliability, and ease of management. We offers a wide range of consulting, design, and implementation services as well as products with partnership from industry leaders, such as Cisco, HP, Mikrotik, Planet and others to ensure that your core network will be sound, robust, and scalable. Once you have a scalable and robust LAN in place, the next step is to extend your LAN into a MAN or WAN. Whatever your company is a multinational one, with remote users and business partners located around the world, all these result in integrating your network into a single flexible and reliable architecture. Our experts, networking consultants and networking engineers, design the most robust and cost-effective WAN solution available, such as IPLC, IPVPN, and VPN, depending on your business needs. We have the right people, the right technology, and the right partners to design, build, and manage your networks.

Hazhar.net SOLUTION A data center houses your network's most critical systems and is vital to the continuity of daily operations. Consequentially, the security and reliability of a data center and its information is not only a top priority, but also ensures an organization's survival in case of any disaster. Data center architectures and requirements can differ significantly, but Hazhar.net can design and implement a robust, cost effective, scalable and highly accessible data center to support your business' needs. With Hazhar.net's experienced team on your side, your business can count on high data availability, security and integrity at all times.

Our robust data center solutions include:

- Design and layout services of the data center
- Design and implementation of IT cabinets
- Design and implementation of UPS and power distribution
- Design and implementation of generator and ATS
- Design and implementation of battery systems
- Design and implementation of computer room air conditioning and cooling distribution
- Installation of raised flooring and fire detection systems on Novec 1230 and other dry-type suppression systems
- Installation of environmental monitoring systems
- Design and implementation of CCTV and IP-camera systems, access control systems
- Design and implementation of structured cabling solutions
- Design and implementation of cable pathways

Structure Cabling When your business employs technological solutions before its growth, it often finds itself reaching a limit of its cable infrastructure design. Speeds need to improve and structured communications have to be set up in place for your business runs smoothly. Cluttering and congesting of cable structures can be a hindrance for both communications infrastructure and the location its placed in. To solve these issues, structured cabling solutions need to be implemented. Hazhar.net' certified engineers will design, plan, engineer and execute the wiring foundation needed to meet your current and future needs. From single to multi-point connectivity, we can custom design a cable infrastructure for your organization today that will be scalable for future growth. If you're thinking about rewiring or reorganizing your current setup to prepare for growth, that's well within our wheelhouse too. Our start-to-finish solutions include data center design, fiber optics and wireless design and implementation.

We offer a wide range of consulting, design, and implementation services as well as products with partnership from industry leaders in building management field. Our systems solution, web-based design and visualization interface, provide powerful connectivity, and advanced control, monitoring and analysis, for your Internet of Things building. Controllers utilize BACnet/IP and IT standards, delivering empowered IP connectivity and open integration with building management systems. Choose wired IP, Wi-Fi, or combine both on a same controller to suit the building's infrastructure, architecture and layouts.
Field Devices
Hazhar.net provides to customers with an extensive range of field devices to complement our building automation offering for a complete, cost-effective solution, from design to installation.
AC -- Access Control WI – Wireless AV -- Air Velocity CB -- Wire and Cable CS - Current Sensing DA - Dampers & Actuators FS – Fluid Sensing GS – Gas Sensing HS – Humidity Sensing ID – Inverter (Variable Frequency) Drives LS – Light Sensing ME – Meters NC – Network Connectivity PP – Panel Products PW - Power PS – Pressure Sensing RE - Relays SC – Signal Converters TS – Temperature Sensing VA - Valves & Actuators

Smart Technologies Every day more cities have the vision to integrate information and communication technologies to analyze what is happening. These technologies and their data help cities make better decisions to improve their efficiency, security, traffic, water supply networks and waste management, among others. To collect all this data, the cities need connected sensors integrated with real-time monitoring systems, sources becoming from citizens and devices and then need to be processed and analyzed. These information's and knowledges are the key to improving the inefficiency. Our approach Hazhar.net solution helps customers store and analyze the data of thousands of sensors in real-time. We enable cities with the right tools to manage, monitor and predict events, situations and problems to solve them together with the city. Our platform is ready to scale and has flexible pricing to grow as the city grows

Hazhar.net offers a full array of repair services and planned maintenance programs.

As a leading provider of global security solutions, Hazhar.net can offer a thorough security risk assessment that pinpoints the unique security challenges and vulnerabilities of any organization. Our knowledgeable, certified professionals can provide free site assessments to clients. We have worked with clients ranging from local stores and small chains to government agencies, giving us the experience needed to identify security issues for any type of facility and recommend effective solutions.

This Hazhar.net team consists of certified system and integration specialists of combined experience in IT and security solution architecture, so our clients can trust we can deliver integrated software platforms that save businesses time, money, and resources.

At Hazhar.net, we have years of experience providing complete security solutions to customers across the country. We've invested heavily in keeping up with the latest trends in technology, regulations, and best practices. Hazhar.net understands that every company or organization has unique security challenges and requirements. By performing on-site facility security surveys and discussing your daily business operations, Hazhar.net learns the needs of your company and assists in meeting your company's needs and objectives.

Our Hazhar.net trusted security advisors will partner with you to develop best in class comprehensive security solutions and make recommendations to address security gaps and improve operational efficiencies. We understand the security risks you face daily, and can take the lead and be your trusted source for your total security solution.

Deploying the right service solution is as important as your security system's initial design and installation. Implementing an effective service solution will enhance your system's performance and provide for a greater return on your investment while supporting your business and optimizing your equipment's life-cycle performance. Hazhar.net will review a variety of criteria such as available project funding, acceptable risk levels, and ongoing lifecycle maintenance costs to ensure that your service solution matches your budget and security needs.

Hazhar.net offers support through our Technical Assistance Center. Call our team through our support line and get technical support and receive help with troubleshooting system issues. Hazhar.net Technical Specialists are available 24/7 to answer questions on operating your system and to perform minor troubleshooting.
An important part of implementing new security technology is ensuring your employees and staff understand the technology and how to run it efficiently. We want to partner with you in this process to ensure you can take the greatest advantage of your system. Hazhar.net can provide training on-site at your company, online, or at our Learning Center training facility.

Hazhar.net is a leading provider of integrated security solutions.
